Wykład w lżejszej formie w tekście *Metafizyki**

ABSTRACT

A light-hearted lecture in the text of *Metaphysics*: Two chapters 7 and 8 of Book 7 in *Metaphysics* contain notes from three lectures on the topic of generation. At the beginning, a couple of remarks are made on the theme of biological procreation, which is taken up again in the repeat lecture summed up in chapter 9. This lecture is given in a light-hearted form, with sometimes frivolous allusions to the matter of sex. If one does not take into account this aspect (as it is usually done), the text becomes unintelligible.
